

Thank you for choosing to spend the day at America's favorite waterpark!

Wet 'n Wild and the FAS are excited to offer you and your students the opportunity to look beyond the thrills and experience the scientific side of Wet 'n Wild. Included in this packet, you'll find:

- Student "Science Challenge" Worksheet
- Master Worksheet – If more copies are needed
- Teacher/Chaperone Worksheet – Includes answer key and helpful hints to reach those answers!
- Teacher Evaluation Survey – Help us continually update and improve this program

We've designed this worksheet as a sample of some of the scientific principles that make Wet 'n Wild a fun, exciting and safe experience for our guests. It can be used in conjunction with a day of swimming and fun, or stand alone as an experience for groups opting not to swim.

We do recommend that you bring:

- Pens or Pencils for your students
- Copies of the Worksheet for your students and copies of the Answer Key for your chaperones
- Calculator (optional) – We've tried to simplify the math so your students won't need a calculator, but you might want to bring one for yourself just in case!
- Clip Board – Again, you might find this a handy tool
- Students with a Great Attitude for Learning AND Fun!

Thanks again for choosing Wet 'n Wild!

Sincerely,

Wet 'n Wild Youth Group Sales Staff
